Capcom Co., Ltd.

Fields Corporation (Head office: Shibuya-ku, Tokyo; President and CEO: Hidetoshi Yamamoto) announces the nationwide release of Rodeo Co., Ltd.'s new pachislot machine "Devil May Cry 3."

The new machine features contents from the "Devil May Cry 3" video game software developed by Capcom Co., Ltd. This game software gained high acclaim for its horrific battle scenes between a devil hunter, who has inherited the blood of a legendary demon swordsman, and devils from a hellish world. Some 6.5 million units of the software have been sold in Japan and overseas, from its release in August 2001 until September 30, 2006.

Capcom fully cooperated with Rodeo to create the exhilarating action sequences of Dante, the Devil Hunter, which are reproduced on an outstanding 20-inch "donut-vision" screen featuring amazing quality and beautiful images. The plot centers on a fateful showdown between Dante and his elder brother Vergil, with fierce battles taking place between the two brothers in the "Devil Bonus" arena, where players can attain the climax of excitement with the delivery of bonus coins.

Featuring the latest model of the battle bonus function, the new "Devil May Cry 3" pachislot machine will have wide appeal among game fans as well as pachislot enthusiasts.

"Devil May Cry 3" is scheduled for delivery in late June to pachinko halls throughout Japan.
